TOTAL CODES IN FY 2027

Who uses these codes: all discharges and patient encounters from **October 1, 2026 through September 30, 2027**.² Deleted codes are not valid for those dates, so claims that use them will not process.³ **Note on totals:** some publications report different counts. The numbers above come from the official NCHS FY 2027 addenda file.¹

Deleted codes and what to report now¹

These 30 codes are no longer valid. Most were expanded into more specific codes, so the fix is usually a more specific code from the same category. Update superbills, EHR favorites and charge masters first.

Highlights by specialty¹

New codes add specificity in areas where providers already document the details. The payoff comes when documentation and code selection match, so share these with your providers.

Cardiology

- **I42.00-I42.09** dilated cardiomyopathy now separates familial-genetic (I42.01) from other types.
- **I42.81** arrhythmogenic cardiomyopathy; **I47.22** catecholaminergic polymorphic VT [CPVT].
- **I49.81** Brugada syndrome and **I49.82** ventricular bigeminy get their own codes.

Oncology and genetics

- **C78.31, C78.32, C79.83** secondary malignancy of the larynx, pharynx and oral cavity.
- New category **QA1: QA1.71** Lynch syndrome, **QA1.790/QA1.791** familial cancer syndrome with pathogenic BRCA1/BRCA2 mutation, **QA1.792** Li Fraumeni syndrome. Code also genetic susceptibility (Z15.0-) if applicable.²
- **Breast:** D05.- (carcinoma in situ) now has an Excludes1 for C50.-, so the two are no longer reported together.^{2,4}

OB/GYN

- Ectopic pregnancy by site with or without intrauterine pregnancy: interstitial (**O00.12-**, **O00.13-**), cesarean scar (**O00.31**, **O00.32**), cervical (**O00.41**, **O00.42**), cornual (**O00.51-**, **O00.52-**).
- **O31.40X- to O31.43X-** continuing pregnancy after vanishing twin syndrome, by trimester, with the fetus 7th character (28 codes).

Orthopedics and podiatry

- **M67.A01/M67.A02/M67.A09** plantar fasciitis now has its own codes with laterality.
- **M72.20-M72.22** plantar fascial fibromatosis and **M86.8X-** other osteomyelitis gain laterality.
- **M04.3** VEXAS syndrome (an adult-onset autoinflammatory disease).⁴

GI, hepatology and endocrine

Go-live checklist for October 1

Recommended steps from Advanced Coding Services. Items tied to an official rule carry a citation.

- 1 Swap deleted codes.** Remove the 30 deleted codes from superbills, EHR favorites, order sets and charge masters. Use the table on page 1.
- 2 Load new code files.** Confirm your EHR, encoder and clearinghouse have the FY 2027 tables loaded before October 1 dates of service.
- 3 Watch dates of service.** FY 2027 codes apply to discharges and encounters from October 1, 2026 through September 30, 2027.³ Keep FY 2026 codes for September encounters.
- 4 Train on documentation.** Tell providers what new detail matters: laterality for plantar fasciitis and osteomyelitis, cardiomyopathy type, ectopic pregnancy site, fibrosis stage.
- 5 Read the guidelines.** Review the FY 2027 Official Guidelines. Narrative changes appear in bold.⁵
- 6 Monitor denials.** Track rejections for invalid or truncated codes in the first 30 to 60 days and correct the source (template, favorite list or mapping).
